**5 Easy Ways to Get the Most Out of Your Carpet**

**1. Check the Warranty.** All stain warranties require regular cleaning & immediate spot removal. Some require PROFESSIONAL CLEANING receipts be supplied for verification.

**2. Vacuum, Vacuum, Vacuum!** Vacuum at least once or twice a week. This removes sharp soil, often not visible to the eye, that can cut & slice fiber causing premature wear. Remove any loose particles that can cause a spot on the carpet.

**3. Have Your Carpet Professionally Cleaned.** Cleaning by a certified professional should be done at least every 12 months according to major carpet manufacturers. Heavy traffic areas may need it more often. Manufacturers' warranties require PROFESSIONAL CLEANING at least every 18-24 months to retain texture retention warranties.

**Rule of thumb:** Clean your carpet before it looks visibly soiled.

**4. Remove Spots Immediately.** Spots can turn into permanent stains very easily. Always use a spot cleaner that is recommended by carpet manufacturer or your trained, certified PROFESSIONAL CLEANER! Many "over the counter" products leave a sticky residue that will cause your spots **to return!**

**5. Have Carpet Protector Re-Applied.** The soil resistor that is built into stain resistant nylon carpet is removed with regular foot traffic & harsh cleaners. To keep your carpet clean longer, have your protector reapplied each time you have your carpet PROFESSIONALLY CLEANED.
